REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to show a radio/cell phone/wireless transmitting device that transmits data through the radio line comprising the combination of storing data temporarily in a storage means, then compressing that data, then transmitting that compressed data through the radio line, along with a throughput judging means for judging the throughput of the radio line or a the data transmitting means performs a best-effort packet transmission or an input speed control means that controls the data input speed or an output speed controlling means that controls the data output speed. No obvious combination of references found would have taught one of ordinary skill in the art to make and use applicant's invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Creighton H. Smith whose telephone number is 571/272-7546. The examiner can normally be reached on M-F, alternate Fridays off.
